

PROJECT NAME:

LABOR ALERT

MAESTRO

LABOR GUARD

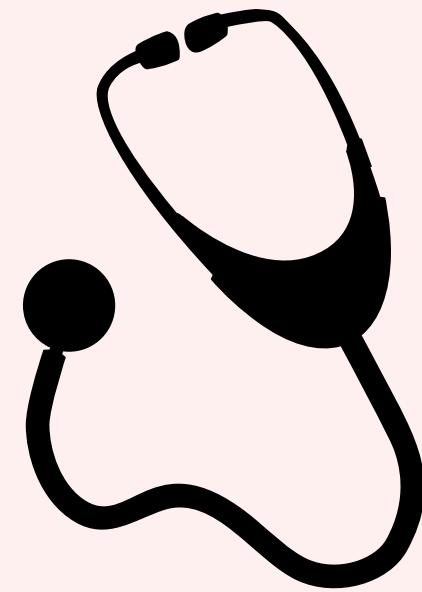

INTRODUCTION

Pregnant women experiencing labor pains often face challenges in reaching hospitals on their own, especially when they are alone. This can lead to dangerous situations and delays in receiving necessary medical attention. Additionally, they may struggle to communicate their situation to their loved ones and hospitals effectively.

PROBLEM STATEMENT

“How might we develop a solution that helps pregnant women in labor easily reach hospitals by providing them with essential information, health tips, and a way to alert their close ones and hospitals in case of emergencies?”

LABOR GUARD

LABOR GUARD

This app can be accessible by pregnant ladies, consult hospitals, near by government hospitals and their loved ones.

HOSPITALS:

- Receiving emergency alerts.
- Records of patients.
- Availability of ambulances.
- Finding best solutions to pick up her.

PREGNANT LADIES:

- Health tips.
- Reminders.
- Communication with others.
- Alerts the hospitals by pressing emergency button.

LOVED ONES:

- Progress of baby.
- Health condition of mother.
- Receiving emergency calls and messages.

PROJECT GOALS

- 1. User-Friendly Interface:** Design the app with a simple and intuitive interface, making it easy for pregnant women to navigate and access the features they need.
- 2. Emergency Button:** Include a prominent emergency button that pregnant women can press in case of labor pains or other urgent situations. This button can immediately notify nearby hospitals and provide them with the necessary information.
- 3. Hospital Database:** Create a comprehensive database of nearby hospitals and healthcare facilities, including their contact information, services offered, and distance from the user's location.

4. Tips and Resources: Provide a wealth of information, tips and resources on pregnancy, labor, and postpartum care. This can include articles, videos, and even virtual consultations with healthcare professionals.

5. Personalized Notifications: Send timely notifications and reminders to pregnant women about prenatal appointments, important milestones, and self-care tips.

6. Emergency Contacts: Allow users to add important emergency contacts, such as their partner, family members or healthcare providers. This way, they can quickly notify them in case of an emergency.

7. Community Support: Create a feature where pregnant women can connect with other expecting mothers in their area. This can provide a sense of community and support, allowing them to share experiences and seek advice.

8. Appointment Reminders: Implement a reminder system for prenatal appointments, ensuring that pregnant women never miss important check-ups or tests.

9. Health Tracker: Include a feature where women can track their health and monitor their baby's growth. This can include tracking weight, blood pressure, and fetal movements.

Thank you!
